Presenter Information

Veterinarian Stream Presenter: Aaron Forsayeth

After graduating from the University of Queensland in 1996, Aaron started his veterinary career in mixed practice at the Roma Veterinary Clinic in 1997. Here he was exposed to a wide range of things, not least of which dental procedures. Having received minimal formal training in any dentistry whilst at university, these initial experiences with dentistry were daunting. He moved to Mudgeeraba Animal Hospital in 1997, where work revolved mostly around small animals. Dentistry was a part of this practice, however over the ensuing years it became a much larger part, and his interest in it grew.

In 2001 Aaron started exploring more training in small animal dentistry and began working with Dr Gary Wilson. After obtaining membership in Veterinary Dentistry in 2004, dentistry became a much bigger focus of my career. In 2006 Aaron formally joined Dr Wilson, and for the last 13 years has exclusively worked in dental referral practice with Advanced Animal Dentistry. In 2018, with the retirement of Dr Wilson, Advanced Animal Dentistry restructured and Dr Rebecca Tucker came on board as partner.

Today Aaron continues to thoroughly enjoy his work, especially helping to provide Veterinary Dentistry continuing education throughout Australia.

Veterinary Nurse Stream Presenter: Maggie Burley

Maggie has worked in small animal general practice for over a decade. Her passion for dentistry has led to her obtaining the Diploma of Veterinary Nursing (Dentistry), and the VTS in Dentistry – the first & only in Australia. She has studied under Veterinary Dental Specialists both in Australia and the United States.

Maggie is experienced in conducting nurse dental clinics and assisting in both general practice dental procedures and advanced specialty procedures. She has a passion for sharing her knowledge with others and her enthusiasm is contagious. Maggie became focussed on dentistry after seeing many pets in obvious pain and discomfort due to oral health problems, and finds it highly rewarding to see the improvement in a pet's life following effective and appropriate dental treatment.

Maggie's goal is to educate others in the industry, so they can help pet owners to better understand the importance of their pet's oral health. Her hope is that veterinary dentistry continues to grow and that a good oral hygiene routine becomes a normal part of every pet's daily life.
